Gather everything that you want to put into storage.
If items need to be packed, put them into boxes. Don’t use a garbage bag; they tear easily and lack ventilation, which can cause mildew.

Grab Tape and a Tape Measure.
Be sure it’s tape that can be removed easily, like gaffer’s tape.

Mark out Unit Size with Tape.
You can create a taped space that’s 5’ x 10’ size.

Move All Items into the Taped Area.

Take in account the 8 feet high ceilings that the units have.

Re-measure if Necessary.
Public Storage also offers storage units in the following sizes: 5’x5’, 5’x15’, 10’x10’, 10’x20’, 10’x25’

Make a reservation.
Once you know exactly how much space you need, you can reserve a storage unit with Public Storage.
