

## HOW TO CHOOSE A STORAGE SPACE TIP SHEET

Here are some quick tips to help you decide what size you need.

### STEP 1

#### **Gather everything that you want to put into storage.**

If items need to be packed, put them into boxes. Don't use a garbage bag; they tear easily and lack ventilation, which can cause mildew.

### STEP 2

#### **Grab Tape and a Tape Measure.**

Be sure it's tape that can be removed easily, like gaffer's tape.

### STEP 3

#### **Mark out Unit Size with Tape.**

You can create a taped space that's 5' x 10' size.

### STEP 4

#### **Move All Items into the Taped Area.**

### STEP 5

#### **Take in account the 8 feet high ceilings that the units have.**

### STEP 6

#### **Re-measure if Necessary.**

Public Storage also offers storage units in the following sizes: 5'x5', 5'x15', 10'x10', 10'x20', 10'x25'

### STEP 7

#### **Make a reservation.**

Once you know exactly how much space you need, you can reserve a storage unit with Public Storage.
